# Admission.

1. Applicants for admission must furnish evidence of good moral character, and produce a certificate of honorable dismission from the Institution of which they were last members.

2. Candidates for admission to the Sub-Freshman Class must sustain a creditable examination in the Common English Branches, McClintock and Crook's First Book in Latin, Latin Grammar, Cæsar, Sallust, McClintock and Crook's First Book in Greek, a Higher Arithmetic and an Elementary Algebra to Simple Equations. For admission to advanced standing, candidates must sustain an examination on all the studies previously pursued by the Class they propose to enter.

3. Students are admitted to pursue an irregular course. Such Students, however, are required to take a sufficient number of studies to occupy their time profitably, and recite in such regular classes as they are qualified to enter.

4. The following Text-Books are recommended for use by our students and by those who purpose to enter our Institution, viz: Robinson's Higher Arithmetic and Elementary Algebra; Harkness' or Andrews and Stoddard's Latin Grammar, Hadley's Greek Grammar; and for the Latin and Greek Classics, Weale's Classical Series.

## Scientific Course.

The same as the above, with the exception of Greek.

## Theological Department.

In connection with the Literary Courses, instruction will be given to those who desire to receive it in a course of Theological Studies occupying three years. This Department is now no longer in prospective. It is actually in operation. It will be seen, from our Summary of Studies, that five Students have received instruction in this Department; six have been registered as preparing for the ministry, and have received instruction gratuitously in every Department of the Institution.

# Howard College.

## Buildings.

The main College edifice contains a large Chapel, Library, Apparatus Rooms, Laboratory, Halls, Offices, &c. The Dormitory Buildings, comprising the North Hall and the South Hall, contain forty-four Dormitories, eighteen feet square, together with Recitation Rooms. The citizens of Marion have subscribed liberally for the repair of these buildings.

## Recitations.

The Bell will be rung at dawn, to rise and dress; and, at sunrise, for recitation and study, to which one hour will be devoted before breakfast. The hours for study, recitation and recreation during the remainder of the day will be regulated with reference to strict economy of time.

## Discipline.

Monthly Reports, showing the standing of Students in their Classes and the number of absences from prayers, recitations and rooms during study hours, together with other irregularities, will be sent to parents and guardians.

## Apparatus.

The Institution is in possession of an excellent Chemical and Philosophical Apparatus. More than three thousand dollars have been already expended on these Departments alone; and the College is now supplied with better and more expensive means of furnishing experimental instruction in the several branches of Natural Science than ever heretofore. Much of the Chemical Apparatus has been imported directly from Europe for the use of the College; and no pains or expense has been spared to supply the most abundant and valuable means for illustrating this important branch. Not only is the illustrative apparatus complete, but all ordinary appliances for original research and practical investigation are now in the hands of the Professor of Chemistry.

The Philosophical Apparatus is inferior in quality to none in the country. Considerable additions are making in order that this Department may vie with the other in the completeness of its equipments.

The Mathematical Department is supplied with a superior Theodolite Compass, and the usual appliances.

The Astronomical Apparatus consists of such instruments as are ordinarily employed by instructors in this branch. The Telescope

is a refractor of six inches aperture, and eight feet five and a half inches in length. It is mounted equatorially with finely graduated right ascension and declination circles, and has a highly finished driving clock.

The Geological and Mineralogical Cabinet is sufficiently ample for purposes of instruction. A handsome series of Maps, Charts and Engravings has been procured to illustrate the Lectures on Geology.

## Literary Societies.

There are in connection with the College and in successful operation, two Literary Societies—the Philomathic and the Franklin. These Societies are provided with well-selected Libraries; and they must be regarded as valuable aids to the student in the formation of a literary taste, and in affording opportunities for exercies in debate and for obtaining a knowledge of parliamentary rules.

## Commencement and Degrees.

1. The Annual Commencement is held on the LAST THURSDAY IN JUNE.

2. No Student is admitted to a Degree or permitted to take any part in the Commencement Exercises, unless he has creditably sustained all his examinations, performed such other exercises as may have been assigned him and settled all College Dues, including a graduating fee of five dollars.

3. Students who have completed the Scientific Course receive, on the same conditions, the degree of Bachelor of Sciences.

## Expenses.

IN THE COLLEGE.

Tuition, Incidentals, Room Rent and Fuel (per Term of 4½ Months)..... $50 00

IN THE PREPARATORY DEPARTMENT.

Tuition and Incidentals (per Term of 4½ Months)..... $22 50

Tuition is required in advance; and no deduction is made for absence, except in cases of protracted illness. The Student is charged from the time of entering to the close of the Term, unless, for special reasons, he is admitted for a shorter period.

A deposit of two and a half dollars is required from each Student, to recover damages done to the College buildings. The remainder not thus appropriated will be refunded.

BOARD IN THE MESS HALL.

The system of "Boarding in Mess," which was inaugurated during the last session, is still in operation. Its success has more than realized the expectations of even those who advocated its introduction. As the best exhibit of the practical working of the system, we append the reports of the Students who hold respectively the office of Secretary and Treasurer of the "Mess Club."

## Secretary's Report.

HOWARD COLLEGE, May 12, 1871.

*To the Trustees of Howard College:*

GENTLEMEN,—In behalf of the members of the "Mess Club," I respectfully submit to your honorable body the following Report of its operations during the current session:

| | |
|---|---|
| No. of Students in Mess at this date | 22 |
| Average No. during the present session | 25 4-5 |
| " Cost to each per month | $7 55 5-7 |
| " " exclusive of 1st month | 7 35 5-7 |

We feel grateful to your body for having afforded to us the opportunity of thus economizing our means.

Yours respectfully,

J. L. BONNER, Sec'y.

---

## Treasurer's Report.

HOWARD COLLEGE, May 1st, 1871.

*To the Trustees of Howard College:*

GENTLEMEN,—I respectfully submit to your honorable body the following Report of the Finances of the "Mess Club," for the month of April:

| | |
|---|---|
| Rec'd of twenty-eight members, each $10 | $280 00 |
| Am't expended during the month | 201 60 |
| Balance in hands of Treasurer | $ 78 40 |
| Cost to each member per month | $7 20 |
| Due to each member | 2 80 |

Respectfully submitted,

JOHN O. TURNER, Treas'r.

Those who room in the College may, if they desire it, obtain board in the best private families at $15 per month.

## Location.

The location of Howard College is all that could be desired. Marion is situated on the Selma, Marion and Memphis railroad. This road has been completed some distance beyond Marion, and places this town in direct and daily communication with Selma and the great lines of travel running through the latter place. Howard College is thus quite accessible by railroad from all quarters of this State and from the adjoining States. In additon to Howard College, there are located here two large and prosperous Female Seminaries. The town also contains five Churches—the Baptist, Methodist, Presbyterian, Episcopal and Christian. With these surroundings, and with a population of three or four thousand inhabitants, it is evident that Marion affords the wholesome restraint of a moral and intelligent community, without presenting those extraordinary temptations to young men incident to great centres of trade.
